Award Winning Microfilm Scanners

The ST ViewScan III System

FILM • FICHE • FASTER™

The ST ViewScan III - designed for your organization

The ST ViewScan III is the award winning microfilm scanning solution from ST Imaging designed with libraries, governments and businesses in mind. The hardware specifications and state-of-the-art software were developed to enable any user to quickly find the document they need and send digital files faster. The ST ViewScan III Windows™ themed software creates a familiar experience for anyone that has used a PC. In addition, it is compatible with Windows 7, 8, or 10 and easily integrates with any network or email system for easy file sharing. With intuitive, easy-to-use features, including Annotation, Target Area Enhance and OCR combined with the speed of digital documents, the ST ViewScan III unlocks the world living in your microfilm and turns your archives into a more dynamic and accessible resource.

New Scanner Highlights!

14 megapixel, USB 3.0 Color Sensor

The ST ViewScan III's **14 megapixel image sensor** creates clear, high-resolution images when viewing film or fiche. The sensor scans up to 1200 dpi and is capable of 7x to 105x magnification.

More Ways to Share

Users can save and send images to **any network printer or folder, email, Google Drive, Dropbox, FamilySearch and more.**

LED Light

The ST ViewScan III utilizes a bright, energy efficient, pure white LED illumination light that is optimal for film scanning.

Crystal-Clear Glass Field

Only the ST ViewScan III has this proprietary technology that employs optically clear and smooth glass to ensure the original information is viewed and captured as accurately as possible.

One Click Digital Zoom

Quickly zoom to enlarge small text or details of an image by simply clicking on the screen. Click a second time to return to the original view.

Easy Film Loading

The guide rollers make getting started a snap! Simply attach the film, pass under the glass, connect to take up reel and start scanning!

ST ViewScan III - Your Microform Scanner Solution

Image Quality

When you want the best resolution from your microfilm, demand a system with a **High Resolution Image Sensor**. The ViewScan system employs a state-of-the-art **14 megapixel color and monochrome Image Sensor** and uses proprietary technology to further enhance image resolution. Scanners that start with a lower resolution image sensor cannot compete with ST ViewScan III's image quality.

Environmental

ST ViewScan systems are designed to meet or exceed Environmental Protection Agency energy efficiency standards for similar imaging equipment product lines. While the EPA has determined that "[f]ilm scanners could not be included" in the current program specifications, ST Imaging nevertheless remains committed to manufacturing the most energy efficient scanners and protecting our planet.

Premium Software

The optional Premium Software gives the ST ViewScan III advanced features and sharing capabilities. Annotate, ClipMerge, interlibrary loan, cloud storage and so much more are available when you upgrade to ST ViewScan III's Premium Software. (optional)

Cruise Control

ST Imaging's optional feature, Cruise Control Max, allows users to scan a few pages or the entire roll automatically. Cruise Control Light with the ability to scan up to 10 images at a time is available on the Standard software. (Max edition optional)

ST ViewScan III Premium Software Features

Target Area

Enhancement: Clean up text and bring out handwriting by removing scratches and blemishes on the film to reveal the true content.

Share: Quickly email, send to Google Drive, Dropbox or save to a flashdrive all from the ST Premium Software. Images are saved in common image formats.

Annotation:

Add notes, highlight, blackout and more with this powerful tool. Mark up your scans before you print or share.

OCR: Quickly turn scanned images into a searchable document. (optional)

ClipMerge:

Organize and compile your work by combining two or more images onto one page.

Rapid Advance:

Simply enter the frame number and the scanner will advance and quickly stop on that frame. (optional)

High Performance Hardware Features

ST ViewScan III Scanner Specifications

Metal Construction

The ST ViewScan III's durable metal construction ensures reliable performance in any location for years to come.

Camera

- **14 megapixel image sensor
(4384 x 3288 pixel native resolution)**
- **USB 3.0 SUPERSPEED interface**
- Full color camera
- Full HD 1080p video support
- Software selectable resolution up to 1200 dpi

Magnification

Optical with digital zoom capable of 7x to 105x magnification.

Light Source

White LED True Color film-optimized lamps for film and opaque card. Lifetime warranty. Optically clear and smooth glass for maximum image quality.

Film Scanner Carrier Configurations

- Universal Carrier
 - Motorized roll film, fiche, & aperture cards
- Fiche or aperture cards only
- 3M (M-Type) cartridge film adapter on Universal Carrier
- ANSI film clip adapter on Universal Carrier

USB 2.0 Convenience Port

A USB 2.0 port is provided conveniently to the front of the scanner for customers to save their scans onto portable flash drives.

File Output

PDF Multi Page, PDF Single page, PDF Searchable* Multi Page, PDF Searchable* Single Page, Bitmap, JPEG, JPEG2000, PNG, TIFF, Multi Page TIFF, TIFF with Group 4 Compression, Multi Page 1 Bit Bitonal TIFF (300 DPI) with Group 4 Compression

Power Adapter

- Low power design
- 24 VDC 2A, AC 100-240 V 50Hz - 60Hz

Dimensions/Weight

Scanner base dimensions: 12" x 12" (31 cm x 31cm)

Dimensions with optional Universal Carrier:

22" L x 20" W x 8" H
57cm L x 53 cm W x 20 cm H

Weight: 19 lbs. 8.6 kgs

Safety and Approval

Assembled in the USA

UL, cUL, CE, FCC

Operating System Compatibility

Minimum Windows 7 (32 & 64), Windows 8 or Windows 10

Warranty

One-year factory warranty

Scannable Media

Microfilm (35/16mm rolls), microfiche, aperture cards, jackets, color slides. Options available for 3M cartridge film and micro opaque cards.
